

Inflatables Instructions & Rules

- Responsible Adult Supervision is required at all times.
- No Flips are allowed
- No shoes, food or drink allowed in the equipment.
- No sharp objects, pins, jewelry, glasses, etc are allowed while in the inflatable.
- No one is allowed to bounce on the front step - this is used to assist getting in and out of the bouncehouse.
- No one should climb or hang on the inside or outside walls.
- Users should be of similar age to avoid small children injured by larger children.
- Adults should only be allowed for gentle bouncing with toddlers, but not to exceed the unit's user limit.
- The following person's should not be allowed entry: pregnant women, those with physical ailments including wearing of casts, heart conditions, skeletal or muscular illness, injury or pain, individuals under the influence of alcohol or drugs.
- Maximum weight limit is 570 lbs.
- Do not keep outside in inclement weather (rain, storm, wind, etc).

Set up: Put tarp under bouncer - must be flat area. Unfold bouncer and secure bouncer air tube in rear to blower. Must stake into grass to secure bouncer from tipping over or moving. Turn on blower and keep on while in use. Do not set up on concrete/pavement. Blower needs 115 V.

Tear Down: Turn off blower and let bouncer deflate. Roll up bouncer as instructed below.

How to Fold a Bouncer

Fold to the left slightly more than half way

Fold to the right, overlapping the first section

Tightly roll towards the tubes

Secure the strap around the bouncer

Put bouncer in bag
